

COLLEGE OF BUSINESS AND
SECURITY MANAGEMENT

University of Alaska Fairbanks

APPLIED MANAGEMENT

DEGREE

BAM Applied Management

Dynamic. Empowering. Tangible.

The Bachelor of Applied Management degree is perfect for students who have technical training and are interested in pursuing a bachelor's degree.

It offers students with specialized associates degrees, certificates or training the opportunity to apply their skills and achievements toward further academic and career growth.

This degree is specifically designed for students who have technical hands-on degrees or certificates – in fields like automotive technology, culinary arts, hospitality, healthcare, aviation, welding and many others – and who are looking to develop management skills within their current fields. Students benefit from online classes designed to complement their working schedules.

The UAF College of Business and Security Management holds both business accreditation and specialized accounting accreditation through The Association to Advance Collegiate Schools of Business International. This highly sought after dual accreditation has only been achieved by approximately 2% of AACSB universities worldwide and UAF is the only university in Alaska with this distinction.

Lead and manage in your chosen field

Take your technical education to the next level...

BRENNAN PALMER, BAM 2020

Plant Operator, Doyon Utilities

"The BAM program was created for a nontraditional college student. It's designed to work around your life with flexible online class options. With the support of the instructors, I was able to work full time, enjoy time exploring Alaska, and still obtain the education I wanted. I wouldn't say the courses are easy, because that is far from the truth. That being said, the program is designed for you to succeed. Everyone is on your side and they are rooting for you.

My job requires me to work from Delta Junction, so I was unsure if I would be able to continue my education. It is a big advantage to have all of the classes online, allowing me to work anywhere. With an associate's degree, and eight years of experience as an operator, I felt I had topped out in my field. After completing my bachelor's degree, I am prepared for the next step in my career. As one of the first BAM graduates, I have recommended the program to many of my friends and co-workers. The advice I would give someone who is interested in joining the program is to DO IT! You won't regret it."
